

Walk-In Coolers, Freezers, and Refrigerated Warehouses

Bally's pre-engineered, pre-fabricated Walk-In Coolers, Freezers and Refrigerated Warehouses offer the most cost-effective solution to meet your needs. These structures are proven dependable in many different applications, and are reliable investments in today's market.

Expert Solutions

While Bally Walk-Ins and Refrigerated Buildings excel in their intended use, that is only part of the story: we present a value-oriented package with superior Bally products, excellent customer service, state-of-the-art equipment, and forward-thinking design. We provide extensive engineering support from an established team of experts; excelling in a "concept to completion approach". An investment in a Bally Walk-In Cooler, Freezer or Refrigerated Warehouse is backed by over 75 years of knowledge in the cold storage industry.

Panel Construction

Every Bally panel is composed of foamed-in-place non-ozone depleting urethane, sandwiched between heavy metal skins, and available in 4", 5", or 6" thicknesses and a variety of finishes.

Panels are UL and FM listed, and EISA compliant and have the capability for NSF approval.

Our tongue & groove system along with our patented Speed-Lok joining system make installation, expansion, or relocation simple.

All of our panels are backed by a 10 year warranty on construction.

Refrigeration Systems

Bally refrigeration systems are energy efficient and available as: semi-hermetic, scroll, hermetic, and Thermosaver (hot gas defrost) units. We also offer multiple indoor compressor systems with remote air-cooled condensers. Each system is properly selected to suit the specific temperature and humidity conditions of your application.

- The SmartVap electronic control system, Smartspeed Evaporator, and BQZ Quiet Condensing Unit offer the latest in Bally innovation.
- These systems satisfy all of the critical requirements of the Bally insulated envelope. Our refrigeration systems are extremely easy to install with available pre-assembled remote components and economical to operate.
- Bally offers a complete line of evaporators, air-cooled condensing units, packaged outdoor air-cooled condensing units, and other products to satisfy your refrigeration needs.
- Refrigeration systems are designed to minimize down time during the life of the unit.

Doors:

Industrial Cold Storage Doors:

- Manual or power operation
- Single or double horizontal side
- Vertical rise
- Sectional overhead
- Infitting

Hinged Entrance Doors:

- Various sizes to suit an installation
- Available panic hardware
- Anti-condensate heaters

Roofs:

- Membrane roofs, with gutters and downspouts
- Partition wall panels attached to vertical or ceiling panels
- Ante-rooms, loading docks, vestibules
- On-site fabricated built-in insulated floors

Accessories:

- Dock: Seals, Shelters, Lights, and Levelers

Structural Steel Support (will suit local site conditions, construction regulations, and applicable wind, seismic, and snow loading):

- Ceilings: Suspended, and Self supporting ceilings
- External steel shed structures
- Lateral steel bracing, and proper steel support
